

ON-GRADE, BREATHABLE COATING

Versatile, high performance alternative to epoxies with exceptional durability and bond strength.

PROTECTION SYSTEMS

The breathable water-based coating allows moisture vapor to pass through rather than becoming trapped, preventing blistering, peeling and failures of adhesion associated with epoxy and polyurethane coatings.

- **The beauty of an epoxy without the problems**
- **Highly resistant to solvents and petroleum-based materials**
- **Quick dry time, minimal odor, easy to repair**
